

# Bio Septic Treet

## Bacterial Septic Tank and Drain Line (leach field) Metabolizer

- *Metabolizes and reduces Septic Sludge residues*
- *“No-Mess” water-soluble powder formulation*
- *Contains NO harsh chemicals, solvents or acids*
- *Safe for the environment & your plumbing*
- *Unlike liquid products, our dry product has a shelf life of 2+ years*

### BIO SEPTIC TREET

Bio Septic Treet is a microbial product which is designed to metabolize and reduce sludge residues in septic tanks, leach fields and drain lines in septic systems where sludge accumulations cause maintenance problems. The Bio Septic Treet formulation is a “No-Mess” water-soluble powder containing beneficial bacteria only. This formulation does NOT contain harsh chemicals, solvents, caustics or acids so it is safe to handle, safe for the environment, and safe for your plumbing and works for both aerobic and anaerobic septic system designs. Bio Septic Treet non-chemically eliminates the build-up of organic wastes which can block drain lines and cause septic system back-ups and may lead to undesirable leach field odors.

The following are some of the organic wastes that can be removed by Bio Septic Treet:

- Tissue and toilet paper
- Proteins
- Urine
- Human Wastes
- Petroleum Based Wastes
- Hair

## **BIO SEPTIC TREET (cont.)**

Both aerobic and anaerobic septic systems depend on bacteria which MAY accompany the waste to effect its remediation. There are many limiting factors that can negatively affect this environment. Such bacterial limitations can result in incomplete remediation and leave sludge remains which eventually can plug up drain line and leach field piping requiring mechanical removal to correct resulting problems. Bio Septic Treet uses a high concentration of 6 specific Bacillus organisms designed to remediate a broad range of organics and septic sludge in both aerobic and anaerobic systems using a no-mess water soluble packet to simplify application.

## **PACKAGING & APPLICATION:**

**PACKAGING:** Bio Septic Treet is provided in 2 oz water-soluble packets for convenience of application and is packaged for sale in 24oz (12 – 2 oz packets) jars and in 25 lb pails.

**RESIDENTIAL SEPTIC TANK APPLICATION:** Apply 1 – 2 oz dissolvable packet of Bio Septic Treet per 500 gal septic tank to any household toilet and flush. Repeat monthly or as needed!. The dissolvable powder formulation will NOT leave behind messy particles on the inside of the toilet bowl.

**COMMERCIAL SEPTIC TANK APPLICATION:** Apply 2 – 2 oz dissolvable packets of Bio Septic Treet per 1000 gal septic tank capacity to any toilet onsite and flush. Repeat monthly or as needed. The dissolvable powder formulation will NOT leave behind messy particles on the inside of the toilet bowl.

**DRAIN LINE APPLICATION:** Mix 1 – 2 oz dissolvable packet of Bio Septic Treet in 1 quart of water per drain. Stir well, then immediately pour down the drain. Repeat this process every month for each sink drain, shower drain and floor drain. The dissolvable powder formulation will NOT leave behind messy particles on the inside of sinks and showers.
